

Keil Code:

```
#include <reg51.h>
```

```
void main()
```

```
{
```

```
    unsigned int num1, num2;  
    unsigned long int product;
```

```
    num1 = 0x2222;
```

```
    num2 = 0xB BBB;
```

```
    product = (unsigned long int)num1 * num2;
```

```
    P0 = product & 0xFF;
```

```
    P1 = (product & 0xFF00) >> 8;
```

```
    P2 = (product & 0xFF0000) >> 16;
```

```
    P3 = (product & 0xFF000000) >> 24;
```

```
    while(1)
```

```
    {
```

```
    }
```

```
}
```
